## Prove Them Wrong

You are the head speech writer for an Absolute Monarchy. Your king/queen has noticed the changes occurring in society due to the teachings of the numerous philosophers that rise to fame during the Enlightenment. You have been told to strike down these teachings...however, you must do so peacefully as these philosophers have become very popular.

Your task: pick 3 of the philosophers from today's discussion and provide at least 5 sentences for each, refuting their teachings and convince your people that an Absolute Monarchy is the best government for them .
